## KSS FEATURED PRODUCT

## McMillan Straightline Stocks

Killough Shooting Sports has teamed up with McMillan to bring a Straightline stock made of composite material. This stock has all the great features of the Edge along with the forearm and butt running on the same plane and parallel to the bore, giving you a straight recoil of the rifle. The radical forend is engineered like a structural beam for extra stiffness in the vertical axis. A molded in barrel channel increases stiffness. Oversize siderails resist torque and improve tracking in a front rest. The adjustable weight system in the buttstock lets you fine tune weight and balance, but it is not designed for converting from light varmint to heavy varmint. The barrel channel will accommodate the largest legal centrefire benchrest contour. Stocks are available semi-inletted for square tang receivers (Turbo, 10X, Falcon, SPF, Panda, Viper, Nesika, Grizzly, Hall). We keep them available for the 2500X action which will also work for the Turbo and X-III with very slight modifications. We can order it specifically for any major benchrest actions. Offered in 3 weights, Light Varmint, Heavy Varmint, and Solid Fiberglass Fill.
